

# Have you or your community experienced direct impacts of sea level rise or flooding?

# What would you consider to be direct impacts of sea level rise or flooding?

Damage to property

Food availability/price

Home flooded

Mental health difficulties

Damage to property

Access to healthcare services

Resident evacuation

Damage to property

# What would you consider to be direct impacts of sea level rise or flooding?

Inundation

Memories

Travel disruption

Homes and properties damaged

unable to take journey,  
flood water in property

impassable roads

Crop damage

home flooded - having to move

# What would you consider to be direct impacts of sea level rise or flooding?

Financial

Disruption of services

Surface water flooding

Transport

damage to property

internal flood damage

Transport disruption

Issues of road access

# What would you consider to be direct impacts of sea level rise or flooding?

disruption to daily life e.g. travel, closures, property, health concerns

Sewerage

Sanitation issues

Physical health and mental health impact. Damage to infrastructure. Impact on travel and emergency services.

Lack of insurance

More sewage in rivers and sea

Impacts on infrastructure

Infrastructure issues

# What would you consider to be direct impacts of sea level rise or flooding?

loss of income or  
education

Salinisation of e.g. nature /  
soil

community disruption

Damage to wildlife

power loss

Needing landrovers to get  
children to school

Emergency service  
disruption

Communities having to be  
relocated

# What would you consider to be direct impacts of sea level rise or flooding?

Travel

Disruption of any kind

loss of business

Displacement Water  
damage to building Crop  
damage

loss of services

Being trapped, no house  
insurance, can't sell house

Damage to property

poverty

# What would you consider to be direct impacts of sea level rise or flooding?

chemical contamination

PTSD

Animal welfare

Loss of life

Pollution

Impact on our services at  
the council

Insurance costs/availability

Livestock loss of life

# What would you consider to be direct impacts of sea level rise or flooding?

Reduction in property value

disruption to supply chains

Flooded roads

Insurance issues

access to insurance

town centre decline

Wildfire impacts

Stress and anxiety

# What would you consider to be direct impacts of sea level rise or flooding?

Mental Health Issues

Loss of biodiversity

Increased coastal erosion

Business costs e.g. buying in straw for winter housing

People acting to prevent - leaky dams built upstream

Income loss or business interruption

Increase in insurance cost

Stress related to future flood risk

# What would you consider to be direct impacts of sea level rise or flooding?

House buying choices

increase in price of  
goods/services

Service interruption

loss of community

insurance costs

# What would you consider to be indirect impacts of sea level rise or flooding?

mental health impacts

pressure on housing stock

mental health

Town centre economic  
decline

Unattractive coastal  
frontage

disruption to food supplies

Mental health impacts

Housing prices

# What would you consider to be indirect impacts of sea level rise or flooding?

Mental Health Issues  
Increasing

Supply chain timeline  
changes

Insurance costs rising

Water bills

PTSD

Reduction in tourism

Health care system strains

Insurance Prices

# What would you consider to be indirect impacts of sea level rise or flooding?

Insurance cost

Housing prices

Financial impacts/ changes  
eg insurance

House Insurance

Migration

Tensions in communities  
over land

Tourism

Increase in flood defences  
to prepare for the next  
flood event

# What would you consider to be indirect impacts of sea level rise or flooding?

Loss of community

Trying to understand why it happened

uncertainty

reduced investment

Poor road surfaces

Loss of tourism

stability of visitor economy

Need to make sewage systems more resilient

# What would you consider to be indirect impacts of sea level rise or flooding?

Land use

Pressure on local services

Livelihood viability

Job creation

recovery of natural coastal  
processes

Migration

Creation of new coastal  
habitats

loss of sense of place

# What would you consider to be indirect impacts of sea level rise or flooding?

Increase in kayak sales

Unsellable property

lack of trust

People feeling anxious  
about future

loss of inward investment

Law and order

People wanting to act to  
prevent it happening again

Awareness of climate  
change

# What would you consider to be indirect impacts of sea level rise or flooding?

increased awareness of  
flood risk

More attractive coastal  
frontages

Stress related to future  
flood risk

Action on climate change?

Yes

# Have you or your community experienced indirect impacts of sea level rise or flooding?
