

CLIMATE ADAPTATION **COMMUNITY OF PRACTICE**

THURS 23 JUNE 1-3PM:

ADAPTATION FUNDING

1. Introduction / Mentimeter
2. Jouja / Climate philanthropy
3. Charlotte / Abundance Investment
4. Other options
5. Next steps
6. Open discussion

GreenFutures
Network

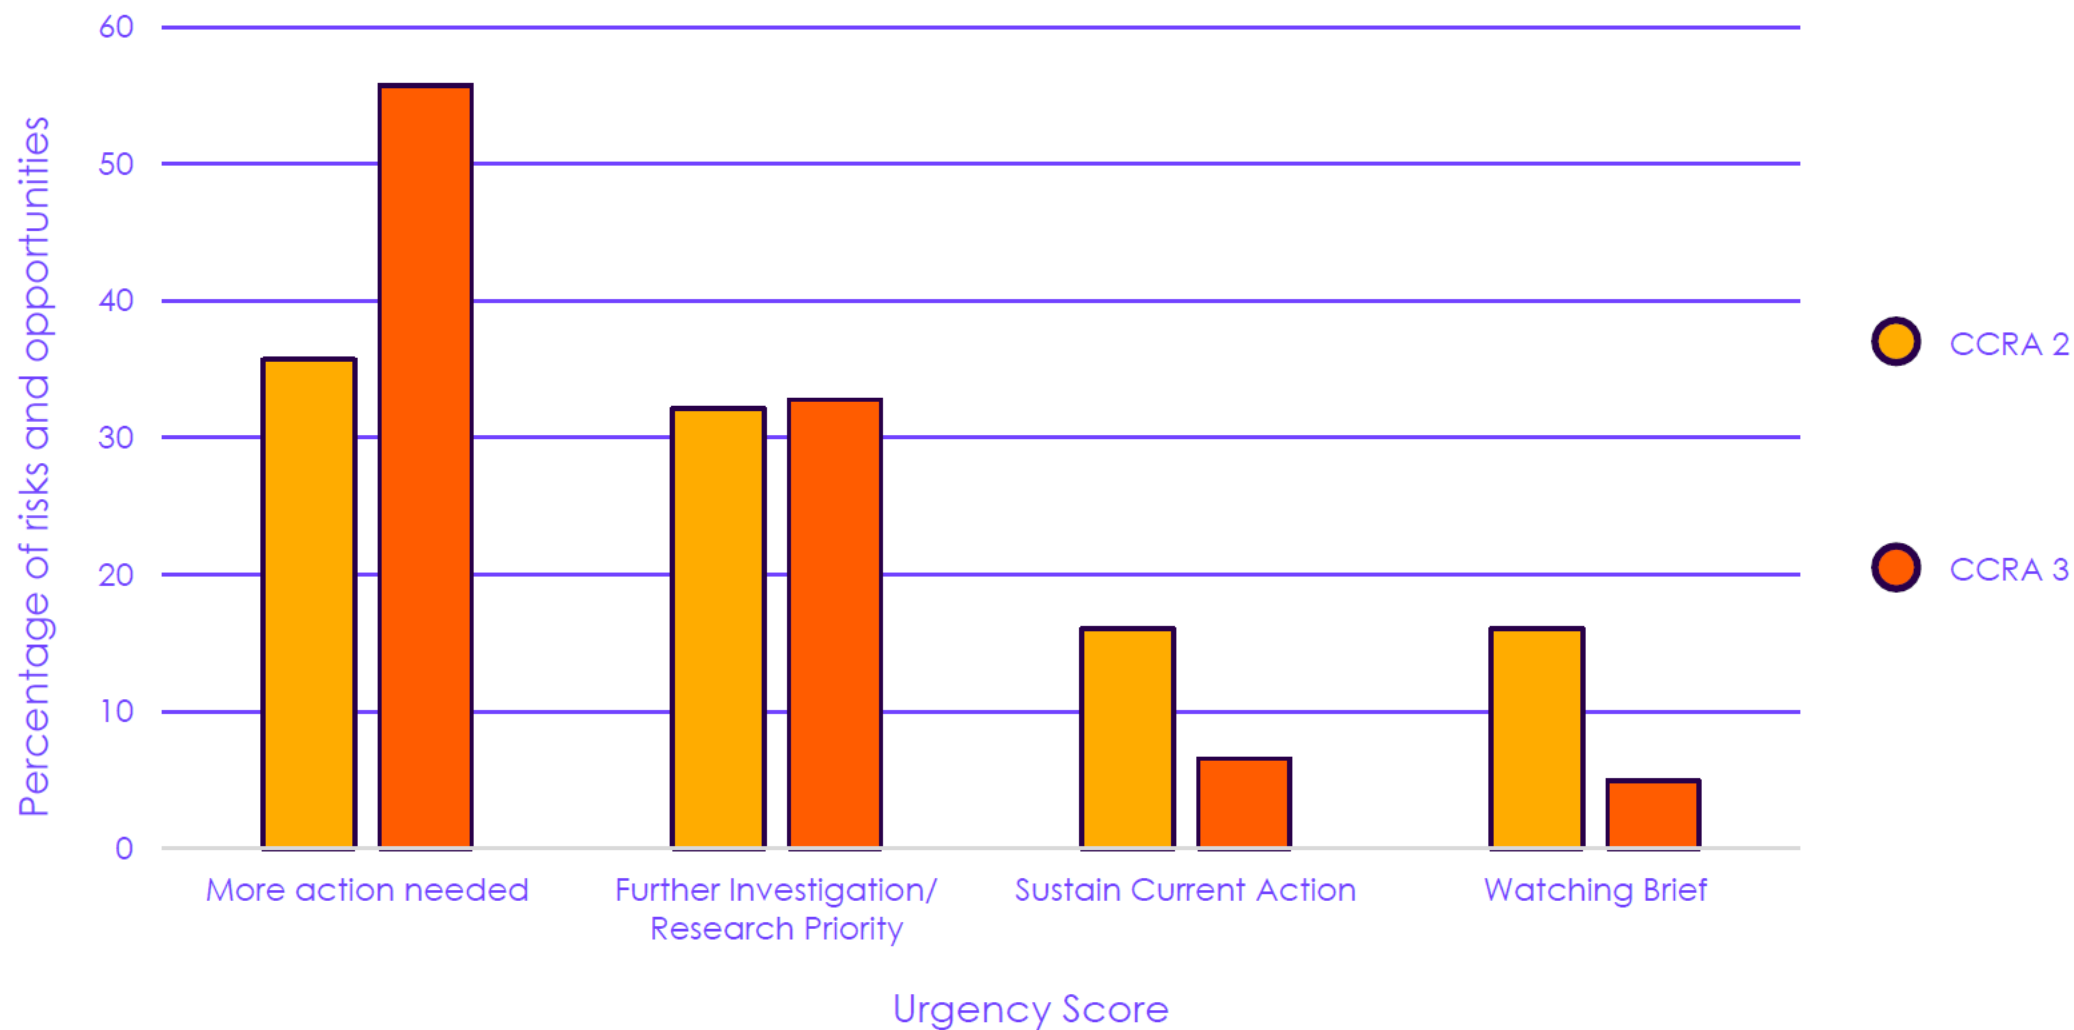

We will publish a report on the challenges and opportunities for financing the actions that will help the UK adapt to a changing climate, and how barriers to the necessary investment in adaptation can be removed.

February 2022

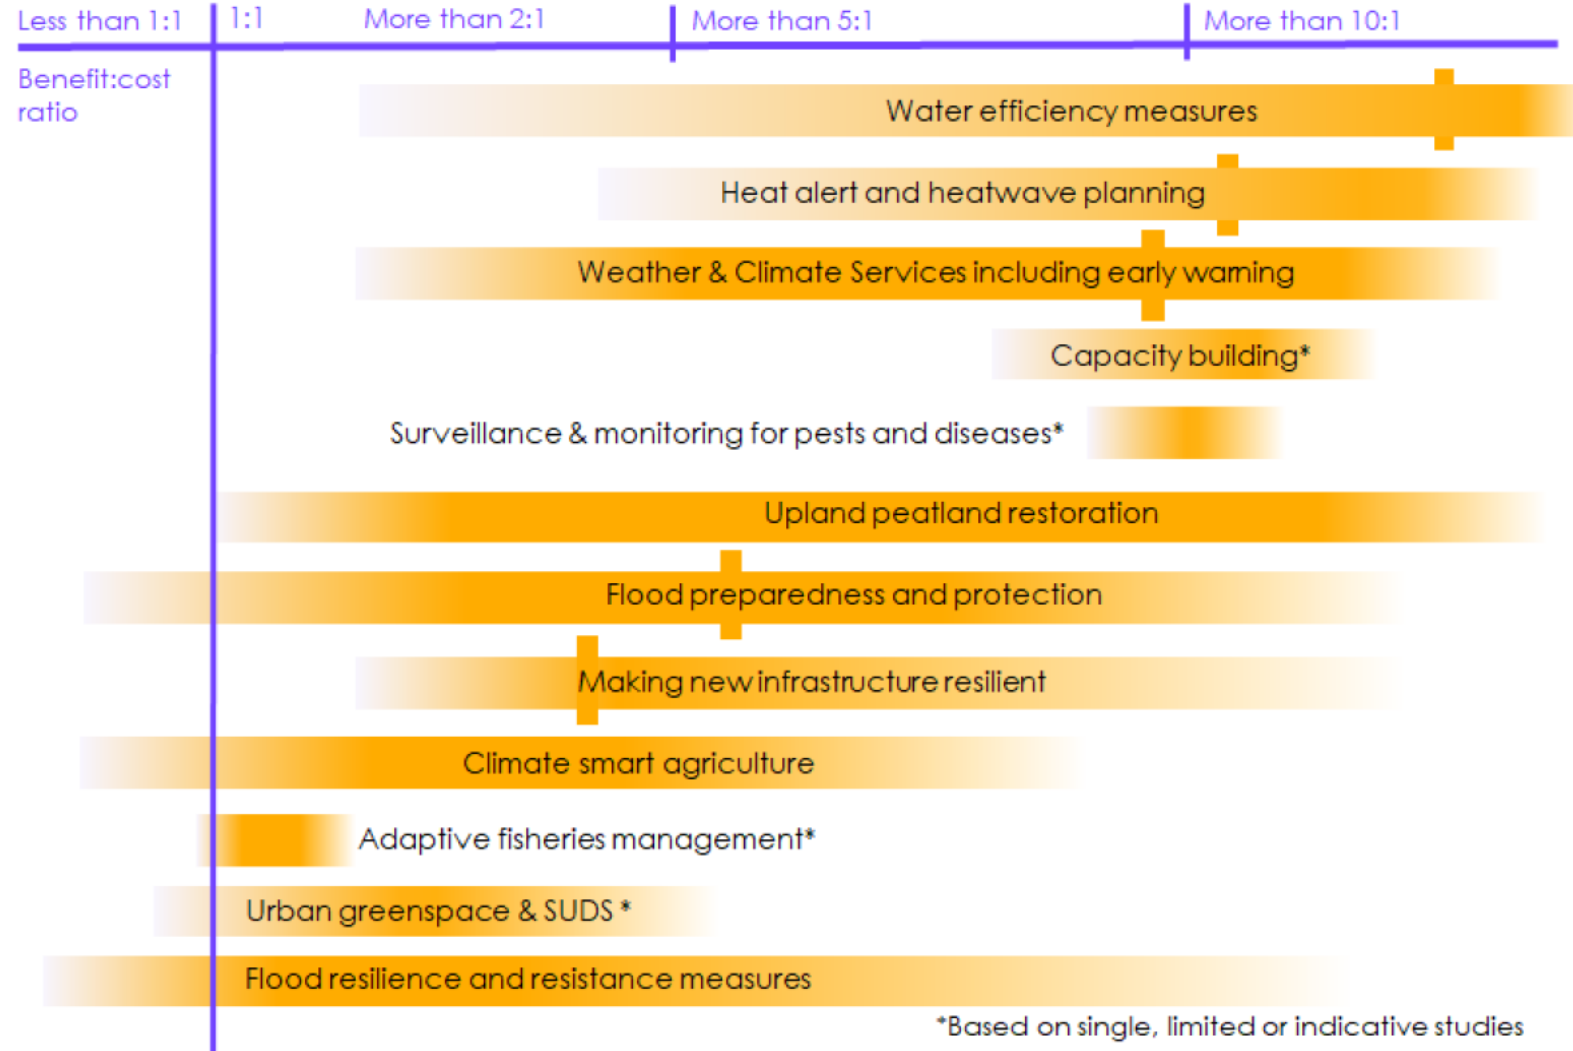

The level of urgency of adaptation has increased since 2017

Source
CCC Analysis

The net benefits of adaptation are high

Grow Back Greener Fund

Grants between £10,000 - £75,000 are available to community projects across the capital that will improve access to green space and help us adapt to climate change.

Focused on adaptation issues specific to London, e.g. *heat, drainage, air quality*

Part of wider target to increase green and blue space in London

More about behaviour change than metrics, e.g. *Thames Water wanting to know about the feasibility of improving drainage or water retention rather than impacts in litres of water*

Key driver is value for money

Many relevant funds don't explicitly describe themselves as adaptation funds
